DASHBOARD

## Features:

**High-quality Materials:** The car mobile phone holder is made of high-quality materials, and the bearings of the car mobile phone holder are made of waterproof metal materials. The base of the car phone holder uses a non-slip mat inside, which can increase friction and reduce the shaking of the car phone holder.

**Adjustable:** The base bearing of the car cell phone holder can rotate 180 degrees. The bearing on the top of the car mobile phone holder can rotate 360 degrees to adapt to the different needs of drivers. The car mobile phone holder will not affect the normal sight of the driver, increasing the safety of driving.

**Anti-slip:** The base of the car phone holder is added with anti-slip soft pads to protect the car surface from damage to the greatest extent while fixing the car phone holder. Because the head-up display does not block your view, your phone is always within your line of sight, making driving safer.

**Simple Installation:** The installation of the car phone holder is simple, you can directly pinch the base of the car phone holder to fix the car phone holder on the sun visor of the car. The entire installation process takes only a few minutes and can be easily completed.

No additional purchase of installation tools is required.

**Widely Used:** The car mobile phone holder can be fixed on most cars on the market and can be fixed on the car's control panel, vents, sun visors and other locations to provide drivers with more convenience. Even on bumpy roads, the car phone holder can be firmly fixed on the car surface, reducing the risk of falling.

## Safe Driving

Drive safely thanks to this support, which will allow you to use your phone without having to be distracted.

## Universal for Smartphones

Car holder compatible with most smartphones.

100% ANTI SHAKING

## Maximum Stability

Support made to ensure maximum stability while driving.

## 360° & 180° Rotatable

360° and 180° rotatable holder for easy and total use of your smartphone.

## Adjustable Inclination

The adjustable inclination of this holder allows easy and total use of your smartphone.

## Multifunctional Installation

This holder can easily installed on your car sun visor, rearview mirror and dashboard.

## Anti-Slip Base

The base of the car phone holder is added with anti-slip soft pads to protect the car surface from damage to the greatest extent while fixing the car phone holder. Because the head-up display does not block your view, your phone is always within your line of sight, making driving safer.

## Non-Intrusive Design

The non-intrusive design of this holder avoids disruption or cover your field of vision while driving.
